

Problem Statement

Drivers undertaking intercity travel often face stressful and potentially dangerous situations when unexpected car troubles arise on fast roads. The lack of immediate access to reliable assistance, coupled with the inconvenience of managing routine car maintenance and sourcing essential supplies while away from their local service centers, creates significant challenges and anxieties for travelers

Solution

This innovative mobile application provides a comprehensive solution by directly connecting drivers in need with immediate roadside assistance, facilitating easy booking of services at Fast Fix centers, and offering a convenient platform for purchasing essential car supplies like

oil, tires, and batteries. Furthermore, the integrated tow truck reservation feature ensures seamless vehicle relocation between cities, offering peace of mind and efficient support for all intercity travel needs.
